

StickBridge Installation Guide

Download StickBridge from stickbridge.com and extract the archive. Start StickBridge by double clicking the EXE file.

If the ViGEmBus driver is not installed yet, StickBridge will show a message at the bottom of the window. Click the message to install the driver.

Tip

For the full 10 minute demo experience, we recommend installing the ViGEmBus driver before starting StickBridge.

Note

After the 10 minute demo expires, StickBridge will close and a license window will appear. You can purchase a lifetime license at stickbridge.com. Payment is possible via PayPal or credit card through PayPal. No PayPal account required.

Important

Because a free demo is available to fully test StickBridge on your system, refunds are not possible after purchase. The license key will be sent by email within 24 hours.
